8 Station Jungle Gym

SKU: aeroEX-6069

Product Features

- Instructional placard with directions on every station.
- Each configuration contains one or more of the following popular gym exercises: low row with dual pulleys, lat pulldown with dual pulleys, adjustable cable column, and triceps press down.
- Four configurations with a varying number of stations, 4-stack, 5-stack, 8-stack, and freestanding adjustable cable crossover.
- Easy to understand exercise placards feature large set-up and start and finish position diagrams that are visibly easy to identify.
- The ergonomic seat and two-piece backrest are anatomically shaped to support the spinal column and to help you assume the correct position during your workout. The wide, comfortable shape accommodates larger users.
- The unit only requires one adjustment for position and comfort. This allows the user to get in and be properly set up with little time needed.
- The ergonomic seat eliminates the need to adjust the seat height and start position, plus the weight stack adjustments are easily accessible from the seated position.
- The precise design of the arm allows it to adjust with the user's body through the range of motion. The pivoting handles move with the body to provide a consistent feel and resistance.
- Glass-fiber-reinforced nylon pulleys for durability, with precision motor-grade ball bearing pulleys.
- The converging arc of movement provides a feeling similar to training with free weights. The independent movement arms result in a more balanced strength improvement.
- The angle of the seat and the arm handle provides the optimal position for stability and muscle engagement.

- Automotive-grade upholstered thigh roller pads provide user stabilization for proper form throughout the movement.
- Oversized, linear, re-circulating ball bearings run on case-hardened shafts and are sealed and self-aligning. Pivot points and joints feature motor-grade sealed ball bearings, or sleeve bearings, utilizing either oil-impregnated bronze bushings or pre-lubricated nylon bushings. Bolts are grade 5 or above in all applications.
